## *Compassionate, comprehensive care for people who have non-healing wounds*

### We help you heal

Being healthy and active are two of life's great pleasures.

For people who have wounds that won't heal, sometimes life is less enjoyable because of pain, fear and difficulty getting around.

Effective treatments can help heal wounds, and that's what the Vanderbilt Wound Care Program at Newport Hospital provides.

Our team of wound care specialists, doctors, nurses and other medical professionals use the latest, most advanced treatments to help wounds heal so that you can feel better and enjoy life again.

### We work with your doctor

There are many medical conditions, even some that you might not be aware of, that cause non-healing wounds. Following our team evaluation, we work with your doctor to develop a wound treatment plan. Treatment may begin during your first appointment.

### Advanced treatment options

Our wound care specialists have experience with some of the most advanced treatments available.

### Insurance coverage

Many health plans cover wound care treatment. Coverage depends on your specific plan and any necessary referrals and/or authorizations that your plan may specify. Be sure to bring your insurance card and any other necessary paperwork, when you visit the Vanderbilt Wound Care Program.

### Please call for an appointment

Making an appointment is the first step to getting better. Ask your doctor to contact us, or feel free to call us yourself.

Our phone number is 401-845-3810.

### Four steps to help you start healing, today

1. Call 401-845-3810 to make an appointment.
2. Make a commitment to keep your appointment.
3. Bring a list of your allergies and medications.
4. Bring your insurance card.
