

About The Miriam Hospital

The Miriam Hospital is a private, 247-bed, not-for-profit, acute care general hospital founded by Rhode Island's Jewish community in 1926. The Miriam Hospital provides a broad range of primary, secondary and tertiary medical services to adolescents and adults, with particular expertise in cardiology, oncology, orthopedics, gastroenterology, urology, bariatrics, immunology and infectious diseases. The hospital also provides a full range of pathology and radiology services as well as psychiatric consultation/liaison services. An important part of the hospital's mission, research attracts millions of dollars in internal and external funding every year to The Miriam Hospital, a major teaching affiliate of The Warren Alpert Medical School of Brown University.

The Miriam Hospital has maintained its designation as a Magnet hospital for nursing excellence since 1998 and in 2020 became one of the few hospitals nationwide to achieve the four-year designation for a sixth consecutive time. The American Nurses Credentialing Center's Magnet Recognition Program is nursing's top honor and is one of the most prestigious distinctions an organization can receive for outstanding nursing care. The Miriam is the first hospital in the state to be certified by The Joint Commission as a Primary Stroke Center, having met rigorous national standards and performance measurements in caring for stroke patients and offering state-of-the-art treatments.

The Miriam Hospital is home to the Center for Bariatric Surgery (accredited by The American College of Surgeons and the American Society for Metabolic and Bariatric Surgery), the Total Joint Center (Joint Commission Gold Seal of Approval), and the Minimally Invasive Urology Institute (the urology program has achieved national ranking by U.S. News & World Report for the past two years).

Location and Service Area

The Miriam Hospital's main campus encompasses 22 acres on the East Side of Providence. Other sites include The Center for Cardiac, Pulmonary & Vascular Fitness at The Miriam Hospital, Dean Ornish Intensive Cardiac Rehabilitation Program, the RISE TB Clinic, The Miriam Hospital Diagnostic Imaging Center, The Miriam Hospital Outpatient Rehabilitation Program, the Lifespan Ambulatory Care Center, the Weight Control and Diabetes Research Center and the Center for Behavioral and Preventive Medicine. The hospital's service area encompasses most of the cities and towns in Rhode Island and southeastern Massachusetts.
