Newport Hospital

Community Health Needs Assessment Implementation Strategy

October 1, 2022 - September 30, 2025

As a result of the Community Health Needs Assessment (CHNA) prepared for Newport Hospital (NH) as of September 30, 2022, NH’s leadership team, executive management, and other individuals critical to the organizational planning process have created an implementation strategy detailing action item plans covering the period from October 1, 2022 through September 30, 2025 to address the significant needs identified in NH’s CHNA report. Based on the complex health issues in the community, NH has strategically planned ways to address these significant needs in order to maximize the improvement of the overall health and wellness of residents within its community. As discussed in the September 30, 2022 CHNA, available online at https://www.lifespan.org/sites/default/files/2022-09/NH2022CommunityHealthNeedsAssessment.pdf, NH identified the following issues as significant health needs currently facing its community:

1. Access to Primary Care and Specialty Services
2. Access to Mental and Behavioral Health Services
3. Outreach, Education and Navigation Assistance to Address Health and Social Services
4. Establish a Patient-Family Partnership
5. Healthy Aging

<table>
