

Did you look before you locked?

Every 10 days, a child dies from heatstroke after being left in a vehicle.

Reasons for Vehicle Heatstroke Deaths

The Facts.

- In ten minutes your car can heat up 20°
- At an outside temp of 60°, your car can heat up to 110°
- Kids bodies heat up 3-5 times faster than adults' bodies

Be sure to ACT.

Avoid heatstroke. Never leave your child or pet alone in a car.

Create reminders. Put items like a purse or briefcase next to your child in the backseat.

Take action. Call 911 if you see a child alone in a car.
