Did you know? Drowning is the leading cause of injury-related death for children 1-4.

Swim Safely With 4-Safety!

- Nothing can take the place of distraction-free supervision.
- Always be within arm's reach of your child.
- Everyone, kids and adults, should swim with a buddy.
- Kids should only swim in designated areas.
- Learn CPR & enroll your kids in swimming lessons.
- Teach kids where to safely enter the pool & to enter feet first.

In open water, kids should only swim within view of a lifeguard. In pools, little kids and non-swimmers should stay in the shallow end.
