

Out of an abundance of caution, all staff in patient care areas will now be wearing masks.

You will be provided with a standard surgical mask and a paper bag for storage. Please follow these steps:

- Perform hand hygiene.
- Put on mask.
- Avoid touching the mask with your hands while it's on your face—touch only the ear loops to adjust.
- Perform hand hygiene, remove the mask, and place in paper bag with your name on it, touching only the ear loops.
- Perform hand hygiene again.
- Use mask for two work days, which do not need to be consecutive.

As with flu and other respiratory viruses, please continue to follow the usual guidelines:

- Wash your hands often with soap and water, or use an alcohol-based hand sanitizer.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Stay home if you are sick.
