

Drive-up testing sites are at CCRI in Warwick and at Rhode Island College in Providence.
(URI site is closed)

Starting Sunday, May 3, the drive-up testing sites at CCRI in Warwick and RIC in Providence will follow this schedule going forward:

- **Sunday:** CCRI will be open from 9 a.m.– 3 p.m.; **RIC will be closed**
- **Monday:** RIC will be open from 9 a.m.– 3 p.m.; **CCRI will be closed**
- **Tuesday-Saturday:** CCRI and RIC will be open from 9 a.m.- 3 p.m.

If the patient has only mild symptoms and no physical exam is needed, a healthcare provider can place an order for testing at one of these drive-up testing sites. As of **April 7, all orders for testing at one of these sites must be done through the online system.** The online portal replaces the need to submit both the East Side Clinical Lab fax form and the PUI form.

To register and use the online ordering system:

1. Go to schedulecovidtest.ri.gov and click on *Not yet registered?* to set up your account. You will need your date of birth, Rhode Island Medical License number, your NPI, an email, and a phone number. Once your account is set up, you can share your password with administrators or medical assistants in your office to assist with future ordering.
2. To place an order, you will be asked to enter your patient's name, date of birth, address, phone, email, symptoms, and risk factors. Finally, you will need to select the testing location and time. All testing will be conducted a minimum of 24 hours after the order is placed.
 - a. If your patient does not have an email, please enter email@email.com.
 - b. The symptoms and risk factor pages replace the need to submit a *PUI for COVID-19 Reporting Form* to RIDOH
3. Give your patient [PUI Instructions](#). Patients will not receive a confirmation that their appointment was booked. From within the portal, you can print a hard copy or download a pdf of the patient's record to give to them or email them.
4. The specimen is collected at the drive-up site and transported to the commercial lab. For children younger than 12, a parent or caregiver will be instructed on how to perform the nasal swab.
5. The ordering clinician will receive lab results directly from the commercial lab. Please communicate these results to your patient, and if the results are positive, inform your patient that a representative from RIDOH will also contact them directly for follow up.
6. Testing results will take three to five days.
7. Report all positive results to RIDOH at **401-222-2577**.

If you have any problems using the online ordering system,
call RIDOH at 401-374-6670 or email doh.elicense@health.ri.gov
